Job Responsibilities:

- Develop and uphold high-quality web applications utilizing React.js.

- Implement responsive and user-friendly interfaces based on design specifications.

- Collaborate seamlessly with UX/UI designers to ensure a visually appealing user experience.

- Optimize application performance to ensure a fast and efficient user interface.

- Conduct thorough code reviews and offer constructive feedback to uphold code quality standards.

- Collaborate closely with back-end developers, integrating front-end logic with server-side logic.

- Create and maintain comprehensive technical documentation for code, APIs, and system architecture.

- Stay current with the latest trends and best practices in front-end development and React.js.

- Install and configure server environments for React deployments.

Job Requirements:

- 5-10 years of professional experience in React.js development.

- Strong proficiency in JavaScript, HTML, CSS, and related front-end technologies.
