

# Continuity policy

Approved by: CEO Niklas Uddholm  
Date: 2023-06-09

Awave is an IT and web agency with broad digital expertise, offering a large clientele of varying sizes and industries, digital solutions in web, e-commerce and apps with related support services.

The business is quality- and environmentally certified and has a data-aware and competent staff in information security.

Continuity is a prerequisite for client and stakeholder satisfaction. Managing vulnerabilities, threats, risks, and their consequences is at the heart of our strategic planning.

In projects/agreements with clients we calculate and offer the necessary routines regarding:

- operating capacity,
- management staff,
- competence,
- setting time and actions in the event of any interruptions.

Management and other teams undertake compliance with this policy, binding requirements and to work with continuous improvement.
