

# Environmental policy

Approved by: CEO Niklas Uddholm  
Date: 2023-06-09

Awave is an IT and web agency with broad technical expertise, offering a large clientele of varying sizes and industries, digital solutions in web, e-commerce, and apps with related peripherals.

In our environmental work we:

- digitize client's products,
- mainly make purchases of electronics from suppliers engaged in sustainability issues,
- recycle or reuse used equipment,
- prioritize digital meetings internally,
- ensure our offices meet high demands regarding environmental certification and operate under so called "green lease",
- inform employees on sustainability issues,

Through this policy, management and staff undertake to protect the environment, prevent pollution, and comply with binding requirements.
